

ABSTRACTPROCESS FOR MANAGING THE PAYMENT OF PARKING CHARGES,
VALIDATION VOUCHER AND VERIFICATION TERMINAL FOR THIS
PAYMENT

The present invention concerns a process for managing the payment of parking charges in a given geographical area for a user (10) of at least one vehicle (13), including the following stages:

- 5 - the user (10) goes to an approved point to subscribe to a virtual pay and display service where he completes a subscription form, where he provides particulars of his bank account, and where he receives an ID in two parts: on the one hand a sticker (11)
- 10 comprising an optical code, on the other a secret code;
- he affixes the sticker (11) to the windscreen of a said vehicle (13).
